

# PUMPTEC

ENGINEERING SOLUTIONS (SMC PRIVATE) LIMITED

## PROVIDING EFFICIENT WATER SOLUTIONS

# COMPANY PROFILE

### Service Set-up

At PUMPTEC, we firmly believe in providing total after-sales support to our client. Our dedicated service team comprises of experienced engineers supported by trained technicians for carrying out repairs as well as on-site trouble-shooting.

### Business Partners

We believe in an open partnership with our suppliers and can be judged by how well we deliver our best in class solutions to our customers. Develop our long-term relationships as partner of choice. Build competitive advantage for the businesses we represent.

## ABOUT US

The company is broadly divided into two key activities, trade and services. The company provides a large spectrum of services and solutions to a fast growing client base. We offer design, engineering, supply and commissioning of pumping systems with our pool of technical specialists. The systems are designed keeping in view the customers requirement, as well as stringent quality standards. We offer you a total solutions pump package. We provide world renowned products and brands from global industry leaders. Our philosophy is to provide quality products to our customers.

## VISION

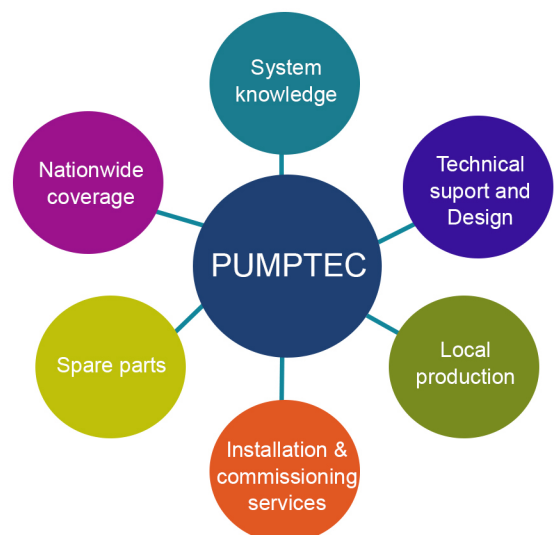

Company vision is to become recognized as a leader in providing the highest standards of customer services to users installers and suppliers of pumps mechanical seals and other types of rotating machinery.

## PUMPTEC ENGINEERING SOLUTIONS

Our experts main concern has always been the satisfaction of our clients and meeting their utmost expectations. Our local market and technical expertise along with various dimensions of buildings designs serve our clients demands and their business approach in order to generate cost-effective , functional, and inspiring solutions.

### PUMPTEC Core Competencies

# OUR PRODUCTS AND SERVICES

PUMPTEC have engineers and managers who work closely with consultants, end users & contractors to design, develop & execute turnkey pumping solutions with the help of its associated international partners. Our product and services include:

Domestic water pumps solutions

Waste water, Sewerage & Drainage pumps

Fire-fighting solutions

MEP contractor

Tubewell construction/Ground water survey

# DOMESTIC WATER PUMPS SOLUTIONS

We are in the fields of Water Pumping Solutions, We are importers & stockist of all type of pumps of various reputed brands like Grundfos, ESPA, LEO, Petrollo, Stairs, Ariston water heaters. We provide cost effective solutions using innovative technologies and latest softwares according to your site conditions.

## PUMPTEC Pressure Booster

Pumptec Pressure Booster systems can provide peak pressure to every bathroom or water fixture in your home and garden at the same time. Enjoy pressurized water at each tap in your home regardless of its location in the house. PUMPTEC Pressure Booster Pumps can provide pressurized water in each shower of the home. It will also not affect the pressure if another shower, tap or washing machine is turned on. Reliable, Long Lasting Pumps are built to the highest engineering.

## Hot Water Geysers

Ariston is the global specialist in the thermal comfort with a unique expertise and cutting-edge innovation in heating and water heating products for over 50 years serving more than 150+ Countries. Products are higher energy efficient ,100% quality & safety check made to last for longer.

## Hot Water Re-circulation Pumps

## Pumps For Other Applications

# WASTE WATER, SEWERAGE & DRAINAGE PUMPS

Waste water pumps transport heavily contaminated water which often contains solid particles of various organic, inorganic and mineral origin. Single-stage designs are preferable. Waste water pumps are non clogging pumps generally not self-priming. They are completely submerged in the fluid handled. Wear-resistant mechanical seals are used as a shaft seal.

## Equipment Deliveries

We are committed to provide on time deliveries of our products and services to our customers. To ensure this, we plan, communicate and coordinate all the activities necessary to achieve desired level of output in minimum possible time. The purpose is to deliver the right product at the right destination in right time and thus satisfy the customer.

# FIRE FIGHTING SOLUTIONS

PUMPTEC Engineering Solutions has been the leading fire protection and life safety company for many years provides only the highest quality fire fighting equipment in Pakistan. The full service company designs , installs, repairs, services and inspects a wide variety of fire suppression and life safety systems. We are specialized mainly in the field of FIRE Products, fire piping, fire hydrants, fire hose reels installation in both commercial and residential buildings

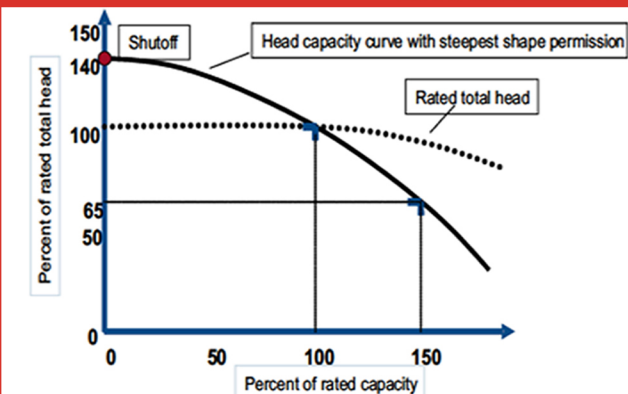

PUMPTEC is associated with the globally renowned international companies in the fire protection industry such as NAFFCO, SAFEECO, MASDAF.

The company is well known for its very strong engineering team that ensures that their innovative designs are based on the standards of the National Fire Protection Association (NFPA).

**NFPA-20 (standard for fire pumps)**

**We supply NFPA-20 Fire pumps and Controls**

**Complete Fire-fighting layout drawing**

# MEP CONTRACTOR

PUMPTEC engineering having a rich experience in water supply pipe network, installation of pumping machinery, welding & fabrication work. Plumbing services inclusive of installation, testing, commissioning and maintenance of piping, fixtures and plumbing appurtenance within a building, in connection with the sanitary / storm water drainage and water supply. Our services includes Drainage & Sewerage Systems, Water Filtration & Purification Systems, Waste Water & Sewerage Treatment Plants, Water Supply, Building Plumbing Systems, RO Plants, etc.

## Energy Audit of Pump-sets

Do you know the efficiency of your pump set? An energy audit can ensure whether the efficiency of your pump set is over an acceptable limit or it needs further improvement. A recent survey by experts on thousands of agriculture tube-wells reveals that at least 20% improvement in the efficiency of every tube-well is possible if proper pump selection is made. In Pakistan majority of tube wells have been yielding water for more than 30 years. We offer Energy Audit Service, in which your water requirement and head is determined with latest tools and techniques and an optimum pump type and size is suggested by experienced engineers. The process can save more than 20% of your electricity bill.

## Installation and Commissioning

We have extensive experience of all type of Pumps & equipment installation and commissioning. Procedures related to installation and commissioning have been specifically defined for each piece of equipment, and all our personnel have the necessary skills for the job. They are trained in planning, coordination, management, supervision and inspection duties, as well as in instructing the operating personnel.

# TUBEWELL CONSTRUCTION/ GROUNDWATER SURVEY

PUMPTEC Engineering services include Ground Water Survey (GWS, ERS), Site selection for tubewell, Test drilling & Tubewell development, Well repair & Deepening, Recharging of groundwater, Water quality & Quantity assessment, Training & Capacity building, Providing & Fixing of deep well submersible pumps.

## Electric Resistivity Test

The Electric Resistivity Test is an advanced method that induces electric current into the ground using electrodes to measure resistivity variations in a surveyed region. It can be used for searching for water bearing formation, finding the depths of high or low conductive anomalous layers.

## Bore Video Logging

PUMPTEC has a complete range of equipments to ensure the best operations of tubewell and Submersible pumps.

## Bore Air Compressor Test

A Borewell air compressor works by forcing compressed air into bore through a pipe. The compressed air and water mix together resulting in a mixture that is less dense than the surrounding water and therefore flows upward through the pipe.

## Tubewell Drilling

To provide better quality services in accordance with client satisfaction. We use new technologies state of the art system in drilling process. To help and guide client to understand the ground water issues, & maintaining the highest recovery level in drilling sector.
